MD. SHAKHAWAT HOSSAIN SHUVO

Target Title: Software Engineer
Dhaka, Bangladesh | Phone: +8801571319320 | Email: shuvo.hossain.dev@gmail.com | LinkedIn | GitHub | Portfolio

OBJECTIVE

Aspiring Software Engineer and Computer Science & Engineering student with strong proficiency in **Python, C++, JavaScript, React.js, and FastAPI**, complemented by hands-on experience in **REST API development, database management, authentication, and full-stack web application development**. Experienced in building practical, data-driven web applications with secure backend APIs and responsive user interfaces. Passionate about solving real-world problems through software, learning modern technologies, collaborating with development teams, and continuously improving technical skills.

SKILLS

- **Languages:** Python, C++, JavaScript, SQL
- **Libraries / Frameworks:** FastAPI, React.js, Tailwind CSS, SQLAlchemy, Pydantic
- **Backend:** REST API, JWT Authentication, OAuth2, CRUD, Role-Based Access Control
- **Databases:** SQLite, PostgreSQL, MySQL
- **Tools:** Git, GitHub, VS Code, Postman, Alembic
- **Deployment:** Render, Netlify
- **Testing:** Pytest
- **Concepts:** OOP, Data Structures & Algorithms, API Development, Database Design

PROJECTS

Courier & Logistics Management Platform

Full-Stack Web Application | Live Site | Server

A full-stack courier management platform designed to manage users, parcels, deliveries, tracking information, and administrative operations through a secure web application.

- Developed RESTful backend APIs using **FastAPI, SQLAlchemy, and PostgreSQL** for user and parcel management.
- Implemented **JWT-based authentication, password hashing, role-based access control, and protected API routes**.
- Developed parcel creation, search, filtering, sorting, pagination, and management functionality.
- Implemented parcel tracking with **status, location, description, and tracking history**.
- Built responsive frontend interfaces using **React.js and Tailwind CSS**.
- Created separate user and admin functionalities for managing users and parcel-related operations.
- Deployed the backend and frontend using cloud deployment platforms.

Technologies: Python, FastAPI, React.js, SQLAlchemy, PostgreSQL, SQLite, JWT, Tailwind CSS, Git

Library Management System

Full-Stack Library Management Application | Github | Server

A role-based library management platform for managing books, users, reservations, and book issue records through a responsive web interface.

- Developed CRUD functionality for managing books and library records.
- Implemented **JWT authentication and role-based access control** for users and librarians.
- Built book reservation and cancellation functionality with protected routes.
- Developed user profile management and password update functionality.
- Designed responsive interfaces using **React.js, Tailwind CSS, and daisyUI**.
- Integrated frontend components with backend REST APIs for dynamic data management.

Technologies: Python, FastAPI, React.js, SQLAlchemy, SQLite, JWT, Tailwind CSS, Git

EDUCATION

Hamdard University Bangladesh | 2024 – Present
B.Sc. in Computer Science and Engineering

EXTRA-CURRICULAR ACTIVITIES

Competitive Programming

Codeforces & HackerRank | Present

- Practice Data Structures & Algorithms and problem-solving using **C++**.
- Regularly solve programming problems involving arrays, vectors, linked lists, stacks, queues, trees, graphs, BFS/DFS, DSU, and dynamic programming.

LANGUAGES

Bengali: Native
English: Communication
